

Solar panel for home use 15kW

Overview

In 2025, a 15 kW solar panel system costs around \$36,300 before incentives, based on real installation data from across the country. But your actual price will depend on factors like your roof's complexity, local labor costs, the equipment you choose, and what incentives are. This 15kW string inverter solar panel kit greatly surpasses most electric bills in the United States, which average 920kWh per month. This system requires 874 square feet of space and produces 1,400 to 3,000 kilowatt hours (kWh) of alternating current (AC) power per month, assuming at least five. A 15 kW solar panel system is enough to power the average home—but it'll cost you about \$36,300. Why trust EnergySage?

How much does a 15 kW solar system cost?
