

# Solar power control panel flashes

## Overview

---

If a warning light is blinking on the Solar Charge Controller, it may be due to faulty wiring, battery over-charging or under-charging, or equipment failure. So you have to make sure your system is properly wired, your equipment is up to date, and your battery is being charged. A solar charge controller is an essential component of any solar power system. It typically has a series of on-screen icons and indicator lights that show the status of the system. Is it a good sign?

A bad sign?

Or something in between?

The answer depends on which icon is flashing and why. Check the solar panel for obstructions, as dirt or debris can hinder performance, leading to inconsistent charging.
