

Southern European solar panel prices

Overview

Current market prices range from €8,000 to €16,000, with variations based on equipment quality, installation complexity, and regional incentives. Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable. Before we look at the top 7 markets, let's break down why some European countries consistently offer lower prices. Many EU countries offer direct subsidies, tax credits, and feed-in tariffs, all of which reduce the net price of solar. Prices for photovoltaic modules in 2024 continue to fall. Search4Solar, a European platform for.
