

Things that generate electricity using solar panels

Overview

We use solar thermal energy systems to heat: Solar photovoltaic (PV) devices, or solar cells, convert sunlight directly into electricity. Small PV cells can power calculators, watches, and other small electronic devices. Using the sun's energy to generate usable electricity for households is growing by percentages that nearly reach double digits year over year. While many are aware that the best photovoltaic solar panels and their accompanying systems are the most recognized way to harness the sun's energy, fewer.
