

# Tool battery delivery is short

## Overview

---

Quality batteries from leading brands charge up to five times quicker than regular ones, usually taking less than an hour. This lets you spend more time on the actual work. That is if you understand the basics of lithium-ion chemistry and the role of the integrated Battery Management System (BMS). The BMS is the computer inside your battery that monitors voltage, temperature, and cell balance; when it detects a risk, it can shut the pack down—sometimes permanently. Whether you rely on power saws, angle grinders, orbital sanders, or anything else, you don't want to rely on a faulty battery. This includes regularly. With the battery being so crucial, did you know that you might be prematurely killing your power tool batteries?

This guide will show you how it may happen, and point out some ways to help make your batteries last as long as possible. Core Symptoms of Failure: Key indicators for replacement include severely shortened run time, total inability to hold a
