

# UK Manchester invests in solar glass project

## Overview

---

The University of Manchester has signed a landmark new deal that will see up to 65% of our electricity demand supplied through a brand-new renewables project. We have set ambitious goals to reduce our environmental impact, in line with our core goal of social responsibility. In a major move towards achieving its 2038 zero carbon ambitions, the University has partnered with leading UK clean energy company. The University of Manchester has signed a 10-year corporate power purchase agreement (CPPA) for the 71 MW Medebridge Solar Farm in Essex, marking one of the largest PPAs by a UK educational institution. The construction of Medebridge, located at Ockendon, Essex, commenced in April 2024. Comprising of around 104,000 solar. EDF is the utility responsible for balancing and shaping generation. The deal, effective from Septem, covers 80% of the solar.
