

UPS battery cabinet height

Overview

Minimum cabinet height = Rack height (to top of rail) + Battery height + Space above battery (12" ideal) + Charger height + 6" (for space above charger) Chargers need room to breathe and batteries need extra room above for maintenance (watering and testing). NOTE: Not all options listed here are available for all UPS models. Was this helpful?

. Critical factors include total power load, battery type (VRLA, lithium-ion), runtime requirements, and rack dimensions. Measure available floor space and ceiling height to ensure compatibility. The cabinet is supplied without batteries, so batteries must be purchased separately. The battery cabinets are available in 5 different mechanical dimensions, are able to contain. The dimensions of the cabinets are the outside dimensions, so it is important to take into account the thickness of the material and body stiffeners that are attached to the sides and back of the cabinet for support, fans that take up internal length, etc. Minimum cabinet height = Rack height (to.
