## Overview

---

The batteries are a sealed VRLA 12V nominal, high-rate discharge type with a 10 year lifespan, commonly used in UPS systems, connected in a series of four elements for each group (called a string), for a nominal string voltage of 48V DC. There are five strings in parallel in the. L 9540A thermal runaway testing. According to NFPA 855's ESS installation standards, when successfully completing a UL9540A test, the three feet (92cm) spacing requirement between racks can be waived by the Authorities having Jurisdiction (AHJ) and free up valuable space designed for modern data centers. The performance of the EPIC Series Battery Cabinet. The cabinet provides a means for batteries and electrical equipment to be stored in an enclosure with the option for environmental controls and a means of the following industry and agency standards:
