

Water leaks from photovoltaic panels installed on cave roof

Overview

Solar panels installed too close to roof valleys or flat sections can disrupt natural drainage. Ensuring adequate spacing and proper panel tilt helps prevent this. But don't worry—you're not alone, and this issue is more common than you might think. Understanding. In virtually all cases, the answer is no. When roof leaking after the solar panels are fitted does occur, however, it usually becomes evident very quickly after the installation process is finished. By understanding the causes and taking the necessary actions, you can ensure a watertight solar panel installation and maximize the benefits of solar. Although solar panels provide clean energy, they can sometimes hide roof leaks that go unnoticed until damage worsens. This article explains common causes, signs to watch for, inspection best practices, repair choices, and preventative measures to protect roofing integrity while maximizing solar benefits.
