

What are the prospects for new energy storage industry

Overview

China is on target to add 100GW of new energy storage capacity over 2025-27, more than doubling total capacity to 180GW by the end of 2027 compared with 2024, according to a government action plan issued in September. As countries across the globe seek to meet. The Energy Storage Market size in terms of installed base is expected to grow from 0.52 Terawatt by 2031, at a CAGR of 23.05% during the forecast period (2026-2031). This is expected to drive up long-term demand for metals that are essential for energy storage technologies.
