

What does a network base station site mean

Overview

A base station, also known as a cell site or cell tower, is used for wireless communication. It is a fixed location equipped with antennas and other equipment that receives and transmits radio signals to and from mobile devices, such as smartphones, tablets, and other wireless. Base station (or base radio station, BS) is – according to the International Telecommunication Union 's (ITU) Radio Regulations (RR) [1] – a " land station in the land mobile service. " A base station is called node B in 3G, eNB in LTE (4G), and gNB in 5G. The term is used in the context of mobile. They are communication hubs in a cellular network that ensure continuous service as users move throughout a geographical area. What is Base Station?
