

Which photovoltaic panel sector is the most profitable

Overview

The dominant and the largest market in the world, China, also is the most profitable market for solar energy and has cities in which solar energy is already cheaper than grid electricity. The global solar PV panels market size was estimated at USD 170. 13 billion by 2030, growing at a compound annual growth rate (CAGR) of 7. Growing demand for renewables-based clean electricity coupled with government policies. Global solar PV manufacturing capacity has increasingly moved from Europe, Japan and the United States to China over the last decade. Solar photovoltaics, the technology that converts light from the sun directly into electricity, accounts for the vast majority of new.
