

Will the roof leak when drilling holes to install photovoltaic panels

Overview

Keep Holes Sealed: Since solar panel installation requires drilling holes in the roof, any penetration can cause leaks. Apply industrial-grade sealant to the hardware. In this article, we'll address this concern from various angles. Roof penetrations, which entail cutting holes on the surface of the roof to secure solar panel mounting systems, have the potential to jeopardise the roof's structural integrity and add sites of water ingress. Thorough planning and assessment are non-negotiable. If not done correctly, water can seep in through these holes, causing leaks and long-term damage. **Incompatible Roof:** Some roofs are.
