

# Wind Solar and Energy Storage Policy

## Overview

---

Get the latest renewable energy news, trends, and insights on solar, wind, storage, and policy changes. Stay ahead with Factor This' expert coverage. Wind and solar investments in the first half of 2025 fell 18%, to nearly US\$35 billion (prior to the. As America moves closer to a clean energy future, energy from intermittent sources like wind and solar must be stored for use when the wind isn't blowing and the sun isn't shining. The Energy Department is working to develop new storage technologies to tackle this challenge -- from supporting. Developers added 12 gigawatts (GW) of new utility-scale solar electric generating capacity in the United States during the first half of 2025, and they plan to add another 21 GW in the second half of the year, according to our latest survey of electric generating capacity changes. If those plans. Factor This' News section is your premier destination for the latest updates and in-depth analysis across the renewable energy sector. EIA's latest monthly "Electric Power Monthly" report (with data through Novem), once again.

## Wind Solar and Energy Storage Policy

---

### **EIA: 99%+ of new US capacity in 2026 will be solar, wind + storage**

Solar, wind, and batteries are set to supply virtually all net new US generating capacity in 2026, according to the latest EIA data.
